

Grade 12 March2014 Accounting Question Paper

FIA - Foundations in Taxation FA2011 - FTX Study Text 2013

Police Street Powers and Criminal Justice analyses the utilisation, regulation and legitimacy of police powers. Drawing upon six-years of ethnographic research in two police forces in England, this book uncovers the importance of time and place, supervision and monitoring, local policies and law. Covering a period when the police were under intense scrutiny and subject to austerity measures, the authors contend that the concept of police culture does not help us understand police discretion. They argue that change is a dominant feature of policing and identify fragmented responses to law and policy reform, varying between police stations, across different policing roles, and between senior and frontline ranks.

The examiner-reviewed P6 Practice & Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try to develop your application skills. Examiner's comments tell you what the examiner is looking for in answers.

Now in its seventh year, this annual has established an international reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. The 2015 edition looks in detail at the French Navy and the Bangladesh and Myanmar navies, while significant ships include the Montford Point class mobile landing platforms, the Samuel Becket offshore patrol vessels, and the Skjold class fast attack craft. There are technological reviews dealing with naval aviation by David Hobbs, and current mine warfare developments by Norman Friedman, while warship recycling is discussed by Ian Buxton. Intended to make interesting reading as well as providing authoritative reference, there is a strong visual emphasis, including specially commissioned drawings and the most up-to-date photographs and artists' impressions. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defence professional, this annual has become required reading.

In recent years, an increasing number of clients and third parties have filed claims against

banks such as for mis-selling financial products, poor financial advice, insufficient disclosure of and warning about financial risks. The scope of a bank's duty of care seems to expand, not only to include protection of consumers against unclear risks of complicated products but also protection of professional parties against more obvious risks of relatively straightforward products. This topic raises many questions, both at a theoretical and practical level. This book provides a rich source of information about how various jurisdictions (Germany, Austria, France, Italy, Spain, the Netherlands, England and Wales, Ireland, and the United States of America) deal with these questions and how answers are found or embedded in their national legal systems. The book also contains a detailed chapter on the MiFID I and II conduct-of-business provisions. Finally, the book provides a thorough comparative analysis and perspective.

Why does religion sometimes increase support for democracy and sometimes do just the opposite? In *Faith in Numbers*, political scientist Michael Hoffman presents a theory of religion, group interest, and democracy. Focusing on communal religion, he demonstrates that the effect of communal prayer on support for democracy depends on the interests of the religious group in question. For members of groups who would benefit from democracy, communal prayer increases support for democratic institutions; for citizens whose groups would lose privileges in the event of democratic reforms, the opposite effect is present. Using a variety of data sources, Hoffman illustrates these claims in multiple contexts. He places particular emphasis on his study of Lebanon and Iraq, two countries in which sectarian divisions have played a major role in political development, by utilizing both existing and original surveys. By examining religious and political preferences among both Muslims and non-Muslims in several religiously diverse settings, *Faith in Numbers* shows that theological explanations of religion and democracy are inadequate. Rather, it demonstrates that religious identities and sectarian interests play a major part in determining regime preferences and illustrates how Islam in particular can be mobilized for both pro- and anti-democratic purposes. It finds that Muslim religious practice is not necessarily anti-democratic; in fact, in a number of settings, practicing Muslims are considerably more supportive of democracy than their secular counterparts. Theological differences alone do not determine whether members of religious groups tend to support or oppose democracy; rather, their participation in communal worship motivates them to view democracy through a sectarian lens.

A Core Study Text for the CTA Qualification

In modern societies, full criminal trials are avoided on many occasions. This book is concerned with mechanisms that either divert from or speed up the proceedings. Koen Vriend argues that the fair trial rights as established by the European Court of Human Rights under Article 6 ECHR provide a normative framework that does not only apply in a full criminal trial, but that it can also be used for diverted and shortened proceedings. He shows that the concept of fairness—as derived from ECtHR case law—is a fundamental principle that underlies all criminal law enforcement. It provides for the appropriate framework to assess whether diverted or shortened proceedings are fair and legitimate. The book is intended for criminal law scholars and practitioners and human rights scholars. Dr. Koen Vriend is a Lecturer of Criminal Law and Criminal Procedural Law at the University of Amsterdam.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

The Routledge Handbook of Minorities in the Middle East gathers a diverse team of international scholars, each of whom provides unique expertise into the status and prospects of minority populations in the region. The dramatic events of the past decade, from the Arab Spring protests to the rise of the Islamic state, have

brought the status of these populations onto centre stage. The overturn of various long-term autocratic governments in states such as Tunisia, Egypt, Libya, and Yemen, and the ongoing threat to government stability in Syria, Iraq, and Lebanon have all contributed to a new assertion of majoritarian politics amid demands for democratization and regime change. In the midst of the dramatic changes and latent armed conflict, minority populations have been targeted, marginalized, and victimized. Calls for social and political change have led many to contemplate the ways in which citizenship and governance may be changed to accommodate minorities – or indeed if such change is possible. At a time when the survival of minority populations and the utility of the label minority has been challenged, this handbook answers the following set of research questions. What are the unique challenges of minority populations in the Middle East? How do minority populations integrate into their host societies, both as a function of their own internal choices, and as a response to majoritarian consensus on their status? Finally, given their inherent challenges, and the vast, sweeping changes that have taken place in the region over the past decade, what is the future of these minority populations? What impact have minority populations had on their societies, and to what extent will they remain prominent actors in their respective settings? This handbook presents leading-edge research on a wide variety of religious, ethnic, and other minority populations. By reclaiming the notion of minorities in Middle Eastern settings, we seek to highlight the agency of minority communities in defining their past, present, and future.
