Handbook of Materials Failure Analysis: With Case Studies from the Oil and Gas Industry provides an updated understanding on why materials fail in specific situations, a vital element in developing and engineering new alternatives. This handbook covers analysis of materials failure in the oil and gas industry, where a single failed pipe can result in devastating consequences for people, wildlife, the environment, and the economy of a region. The book combines introductory sections on failure analysis with numerous real world case studies of pipelines and other types of materials failure in the oil and gas industry, including joint failure, leakage in crude oil storage tanks, failure of glass fibre reinforced epoxy pipes, and failure of stainless steel components in offshore platforms, amongst others. Introduces readers to modern analytical techniques in materials failure analysis Combines foundational knowledge with current research on the latest developments and innovations in the field Includes numerous compelling case studies of materials failure in oil and gas pipelines and drilling platforms

Anne of the Island is the third book in the Anne of Green Gables series, written by Lucy Maud Montgomery about Anne Shirley. Anne of the Island was published in 1915, seven years after the bestselling Anne of Green Gables

Just as the AutoCAD software continues to be improved and perfected, so does the Beginning AutoCAD® Exercise Workbook. This work is truly the ideal package from which to learn AutoCAD, whether you're a complete beginner, or simply learning about the latest features. The new AutoCAD 2022 software includes features such as Installer, which reduces the number of steps needed for the initial install, Share Current Drawing, allowing other users to view or edit a drawing in the online AutoCAD Web application, and Trace, encouraging collaboration on drawing changes using the AutoCAD Web and Mobile apps. Readers can download the provided templates used for drawings in the book from the Industrial Press website. Expert author duo Shrock and Heather share their knowledge with students and instructors, including plenty of inside tips and dozens of exercises to help users get comfortable and see real progress. New and/or Improved Features in Beginning AutoCAD 2022: Redesigned Start Tab--There are three main sections that provide access to recent work, enabling users to carry on where they left off, and offering them access to online saved drawing files. (Included in Lesson 1) Count--The new Count feature allows users to count the instances of objects and Blocks that are placed in their drawing. (Included in Lesson 29) Floating Drawing Tabs--Users can now drag a drawing file Tab from the main AutoCAD application window to make it a separate drawing file window. This is extremely useful for those with two or more monitors. (Included in Lesson 2)

It is appropriate that a surgical teacher. Robert E. Hermann. M.D . . with a large experience in a specialized field should author the beautifully illustrated Manual of Surgery of the Gallbladder. Bile Ducts. and Exocrine Pancreas. This manual. which takes its place in the distinguished series sponsored by Richard H. Egdahl, M.D . . is designed for the working surgeon. resident or practitioner. who wishes to refresh his memory or to bring himself abreast of current thinking and technics. The carefully planned format and the elegant color illustrations of Mr. Robert Reed permit this with the expenditure of a minimum of time and effort. and surgeons who must operate on the organs and structures it covers will wish to have it available for reference. Stanley O. Hoerr. M.D. former Chairman. Division of Surgery Cleveland Clinic Chairman. Department of Surgery Fairview General Hospital Cleveland. Ohio Preface Operations on the gallbladder and bile ducts are among the surgical procedures most commonly performed by general surgeons. In most hospitals, cholecystectomy is the most frequently performed operation within the abdomen; approximately 60,000 are performed each year in the United States. In addition, an estimated 120,000 bile duct operations are performed yearly. Pancreatic surgery is less frequent, but because of the close relation between the biliary system and the pancreas, knowledge of pancreatic problems is equally essential to the surgeon.

In Lionel Shriver's entertaining send-up of today's cult of exercise—which not only encourages better health, but now like all religions also seems to promise meaning, social superiority, and eternal life—an aging husband's sudden obsession with extreme sport makes him unbearable. After an ignominious early retirement, Remington announces to his wife Serenata that he's decided to run a marathon. This from a sedentary man in his sixties who's never done a lick of exercise in his life. His wife can't help but observe that

his ambition is “hopelessly trite.” A loner, Serenata disdains mass group activities of any sort. Besides, his timing is cruel. Serenata has long been the couple’s exercise freak, but by age sixty, her private fitness regimes have destroyed her knees, and she’ll soon face debilitating surgery. Yes, becoming more active would be good for Remington’s heart, but then why not just go for a walk? Without several thousand of your closest friends? As Remington joins the cult of fitness that increasingly consumes the Western world, her once-modest husband burgeons into an unbearable narcissist. Ignoring all his other obligations, he engages a saucy, sexy personal trainer named Bambi, who treats Serenata with contempt. When Remington sets his sights on the legendarily grueling triathlon, MettleMan, Serenata is sure he’ll end up injured or dead. And even if he does survive, their marriage may not. *The Motion of the Body Through Space* is vintage Lionel Shriver written with psychological insight, a rich cast of characters, lots of verve and petulance, an astute reading of contemporary culture, and an emotionally resonant ending.

Celebrity Rehab star and Thelonious Monster frontman Bob Forrest's memoir about his drug-fueled life in the L.A. indie rock scene of the '80s and '90s and his life-changing decision to become a drug counselor who specializes in reaching the unreachable. Life has been one strange trip for Bob Forrest. He started out as a suburban teenage drunkard from the Southern California suburbs and went on to become a member of a hip Hollywood crowd that included the Red Hot Chili Peppers, Johnny Depp, and River Phoenix. Los Angeles was their playground, and they hung out in such infamous haunts as the Viper Room and the Whisky a Go Go. Always one to push things to their limit, Bob partied the hardest and could usually be found at the center of the drama. Drugs weren't Bob's only passion. He was also a talented musician who commanded the stage as the wild and unpredictable lead singer of Thelonious Monster. They traveled the world, and their future seemed bright and wide open. But Bob's demons grew stronger as he achieved more success and he sank deeper into his chemical dependency, which included alcohol, crack, and heroin habits. No matter how many times he went to rehab, sobriety just wouldn't stick for him. Soon he saw his once-promising music career slip away entirely. Eventually Bob found a way to defeat his addiction, and once he did, he saw the opportunity to help other hopeless cases by becoming a certified drug counselor. He's helped addicts from all walks of life, often employing methods that are very much at odds with the traditional rehab approach. *Running with Monsters* is an electrifying chronicle of the LA rock scene of the 1980s and '90s, the story of a man who survived and triumphed over his demons, and a controversial perspective on the rehab industry and what it really takes to beat addiction. Bob tells his story with unflinching honesty and hard-won perspective, making this a reading experience that shocks, entertains, and ultimately inspires.

What if you were dropped in the woods with little more than a knife, your wits, and the (hopefully warm) shirt on your back? Could you survive? If you'd read this book, the answer is yes! Survival! It's one of our most primal fears, most basic needs. What do you do when everything is stripped away except your will to prevail? In this book, survival expert Tim MacWelch examines how native peoples around the world and throughout history have made their own shelter, weapons, tools, and more, and well as clever MacGuyver-esque ideas for using anything you might find in your pockets or pack. Whether your goal is to test yourself against nature, be prepared for any catastrophe, or learn more about traditional ways of survival, this is the one book you need. Celestial navigation is the one of the oldest of the mariner's arts - and one of the most awe-inspiring. To guide a small boat across the trackless oceans using only a simple measuring device - the sextant - and the knowledge of the sun, moon and stars is a skill that borders on the magical. In these pages Tom Cuncliffe shows how to master the art in easy stages. Starting from a sound foundation of basic concepts and definitions, he moves on to the hardware: the sextant and how to use it. Within a few pages he has you down on the beach, shooting the sun. From there it is a short step to working out your latitude from a noon sight, and learning how to plot a position from observation of the sun, planets, moon or stars - wherever you may be on the world's oceans. "He writes with the authority of a man who knows that his methods work in the most testing of all examination rooms, a small boat sailing on the open ocean." —Bill Anderson, Formerly Rya Training manager

All Portland, Oregon, vintage clothing store owner Joanna Hayworth wants to do is turn her back on the modern world and retreat into a carefully curated life of satin cocktail gowns, icy martinis, and old movies. But when Joanna finds a key in a 1930s Lanvin coat cast off by an ex-showgirl, everything changes. The elderly woman turns up dead, and Joanna is pulled into a long-ago drama of back room deals, blackmail, and lost love. She must find a very real-and present day-killer before she becomes his next victim. "As you dive into this intriguing mystery novel featuring vintage clothing dealer/sleuth Joanna Hayworth and a quirky cast of characters, prepare for an entertaining ride through long-buried crimes and Portland lore to solve the mystery of 'the woman in the Lanvin coat.' A truly enjoyable read " --Christine Finlayson, author of "Tip of a Bone," a Pacific Northwest mystery "Slip on a pair of pink mules and a silk robe, mix up a shaker of martinis, and relax with this delightful mystery set in a Portland vintage clothing store. Populated by a charming heroine and a flock of odd characters, this engaging tale will satisfy the sleuth in you as well as the fashionista." --Ann Littlewood, author of "Endangered," a zoo-dunnit

Interested in learning to sail but feel like you're navigating in murky waters? *Sailing for Dummies, Second Edition* introduces the basics of sailing, looks at the different types of sailboats and their basic parts, and teaches you everything you need to know before you leave the dock. In *Sailing for Dummies, Second Edition*, two U.S. sailing champions show you how to: Find and choose a sailing school Use life jackets correctly Tie ten nautical knots Handle sailing emergencies (such as capsizing and rescuing a man overboard) Launch your boat from a trailer, ramp, or beach Get your boat from point A to point B (and back again) Predict and respond to water and wind conditions Read charts, plot your course, use a compass, and find your position at sea *Sailing for Dummies* shows you that getting out on the water is easier than you think. The authors keep the sailor-speak to a minimum where possible, but give you a grasp of the terminology you need to safely and effectively communicate with your crew. A textbook, user's manual, and reference all in one, this book takes the intimidation out of sailing and gives you the skills and confidence you need to get your feet wet and become the sailing pro you've always wanted to be. Anchors away!

"This collection of essays brings together some of the finest pieces Hitchens published over the last two decades for the first time in one book, addressing with characteristic wit and erudition the subjects he is best known for, including: the case against God, faith and religious observance; the case for intervention in Iraq; indictments of towering political figures like Bill and Hillary Clinton, Tony Blair, and Henry Kissinger; and celebrations of the writers and thinkers whose work meant most to him"--

Trans(in)fusion is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. It questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(in)fusion resets the dialectics between text and theory.

"GO HOME AND HAVE A NORMAL LIFE" That is what my physician told me when I was discharged after my brain injury in 1997. What did he mean by that? I couldn't read - I couldn't talk properly - I couldn't even dial a telephone number. I had an 8 year old son who needed his mother. Since that day in 1997 I have been trying to find out what a normal life is. Having a brain injury is a journey about finding a new normal and New Brain Living. On May 13, 1997 at 4:00 am in the morning I woke up and I was paralyzed on the right side of my body. When I arrived at the hospital the doctors told me that I have suffered a stroke. I was 40 years old at the time. New Brain Living Revelation Having a Brain Injury and Living With a Brain Injury - Are Very Different! New Brain Living is a place where people with brain injuries and the people who care for them can find answers. During my years of recovery I just wanted somebody to talk about my brain injury so I developed New Brain Living so I could be the voice for the brain injured person. Throughout this book you will see that I speak for the brain injured person "from the brain injured point of view" so the people who care for people with brain injuries can find answers when their brain injured person cannot put into words what is happening in their "new brains." During my recovery I spent a lot of time "trying to retrain my brain" so that "my brain would act the way it did before the brain injury." I realize now that "my old brain is not coming back." My journey to New Brain Living shows that "my new brain" is a "better brain" because I have learned that the concept of "brain plasticity" can be used to train my "new brain" to move recovery forward. It is an exciting time for brain research and recovery from brain injuries. The more we talk about brain injuries and teach brain injured people and the people who care for them to design their own personal recovery paths, it could make "Living with Our New Brains" an ongoing journey to recovery. To the Brain Injured Person: It is my hope that the words written in this New Brain Living book explains to the people who care for you what is happening in your New Brain and help you on your personal recovery path to New Brain Living. To the People Who Care for the Brain Injured Person: It is my hope that the words written in this New Brain Living book will help you understand what is happening in your brain injured person's brain and help you design a personal recovery path to New Brain Living. The New Brain Living design was developed when my left hand was affected after my brain injury so I decided to draw to regain the strength in my writing hand. I have books and books of this design so I decided that I would create a logo for New Brain Living that would be a symbol of my recovery journey. Perhaps other people with brain injuries and the people who care for them will use the New Brain Living design as a symbol of hope. The New Brain Living design symbolizes strength because to recover from a brain injury you have to put your feet on the floor every day and never give up on your recovery no matter what. The jagged edges of the design depicts that recovery from a brain injury is not a smooth process, in fact it is filled with moving forward and then moving backwards but there are also calm times which are also represented in the design because amongst all the turmoil of recovery it is during the calm periods that real recovery can take place.

Cameron Winters is a freak, a mind reader who can hear the thoughts of those around her. Although her life has been far from ideal, she has finally found peace on a Caribbean island far away from her troubles. But her troubles are about to find her in the form of a gorgeous government agent named Maddox.

Once a pristine, natural paradise, CHIMA has become a battle ground for eight animal tribes. Best friends are now enemies. The animals fight for control of a natural resource called CHI, a powerful element that is both a source of life and potential destruction. Only a few brave heroes in CHIMA understand the true nature of CHI, and the possible downfall of CHIMA that will result from its misuse. Their stories, and the stories of those who seek to destroy them, are known as... THE LEGENDS OF CHIMA. The third volume in the hit series continues the adventures of Laval and his fellow members of the Lion tribe as they fight against Prince Cragger & the Crocodile tribe to preserve the balance of the mysterious force known as Chi.

Pell's equation is part of a central area of algebraic number theory that treats quadratic forms and the structure of the rings of integers in algebraic number fields. It is an ideal topic to lead college students, as well as some talented and motivated high school students, to a better appreciation of the power of mathematical technique. Even at the specific level of quadratic diophantine equations, there are unsolved problems, and the higher degree analogues of Pell's equation, particularly beyond the third, do not appear to have been well studied. In this focused exercise book, the topic is motivated and developed through sections of exercises which will allow the readers to recreate known theory and provide a focus for their algebraic practice. There are several explorations that encourage the reader to embark on their own research. A high school background in mathematics is all that is needed to get into this book, and teachers and others interested in mathematics who do not have (or have forgotten) a background in advanced mathematics may find that it is a suitable vehicle for keeping up an independent interest in the subject.

In color throughout, Illustrated Manual of Injectable Fillers clearly evaluates the uses, limitations, and compositions of the growing variety of available fillers involved in face and body rejuvenation. It includes detailed techniques for the facial analysis and diagnosis of aging conditions. This resource helps you provide your patients with safe, reliable, and aesthetically pleasing results, including preventing and properly treating potential complications of filler usage. Clearly organized by anatomy, the book discusses the specific analysis, diagnosis, and treatment for the upper face, midface, lower face and neck, hands, and the torso (after liposuction). It is an excellent introduction for novices performing volume restoration procedures and an invaluable guide to novel techniques and advanced procedures for experienced physicians.

Since the introduction of the personal computer, multi-media has become an important ingredient of modern life. Yet the combination of different media has a long history in western European culture: during the Middle Ages and early modern period, artists from various disciplines collaborated frequently and produced amazingly complex multi-media art works. The contributions to this volume in the series Groningen Studies in Cultural Change take up the challenge to go 'beyond comparatism' in order to study combinations of the arts in the most literal sense of the word and explore the changing attitudes towards the production and perception of multi-media art from the Middle Ages to the early modern period. The topics range from the epistemology of word and image combined, multi-media interior decoration, early forms of 'Totaltheater', political communication, the emotive effects of Lutheran poetry and music, to the eighteenth century French critics of 'ut pictura poesis'.
